## 51 **1. PURPOSE**

52 This document is the *Authority To Offer Services (ATOS) for FICAM TFS Approved Identity*  
53 *Services* and defines the process by which an Applicant, who has been qualified by a FICAM  
54 Adopted Trust Framework Provider (TFP) to meet FICAM TFS Privacy and Security requirements,  
55 can apply to the FICAM TFS Program to be approved to offer their services to the U.S. Federal  
56 Government.

### 57 **1.1 Audience**

58 This guideline is intended for:

- 59 • **Token Managers, Identity Managers and Credential Service Providers**, who are seeking  
60 to offer their services for use by the U.S. federal government.
- 61 • **Trust Framework Providers**, who are providing guidance to entities that they have qualified  
62 under their trust framework, on how to obtain approval to offer services to the U.S. Federal  
63 Government.
- 64 • **Security and Privacy Practitioners**, who recommend, design, build or provide solutions that  
65 meet U.S. Federal Government requirements

### 66 **1.2 Usage**

- 67 1. Read the *Trust Framework Solutions Overview* to understand the background, authorities  
68 and components of the FICAM TFS Program
- 69 2. Read the *Authority To Offer Services (ATOS) for FICAM TFS Approved Identity Services*  
70 to understand the requirements for offering services to the U.S. Federal Government
- 71 3. Read the *Trust Framework Provider Adoption Process (TFPAP) for All Levels of*  
72 *Assurance* to understand the role of the Trust Framework Provider
- 73 4. Read the *Identity Scheme and Protocol Profile Adoption Process* to understand how  
74 protocol profiles are created, adopted and used by the government to ensure that the RP  
75 application and the CSP communicate in a confident, secure, interoperable and reliable  
76 manner.

## 77 **2. BACKGROUND**

78 The FICAM Trust Framework Solutions (TFS) is the federated identity framework for the U.S.  
79 federal government. It includes guidance, processes and supporting infrastructure to enable secure  
80 and streamlined citizen and business facing online service delivery.  
81

82 The *Trust Framework Solutions Overview* document provides a holistic overview of the components  
83 of the TFS which consists of:

- 84 • *Trust Framework Provider Adoption Process (TFPAP) for All Levels of Assurance*
- 85 • *Authority To Offer Services (ATOS) for FICAM TFS Approved Identity Services*
- 86 • *Identity Scheme and Protocol Profile Adoption Process*
- 87 • *Relying Party Guidance for Accepting Externally Issued Credentials*
- 88 • E-Government Trust Services Certificate Authority (EGTS CA)
- 89 • E-Government Trust Services Metadata Services (EGTS Metadata Services)

90 Organizations that define a Trust Framework and certify entities compliant with it are called Trust  
91 Framework Providers (TFPs). Once a TFP has been adopted by FICAM TFS Program, it then has the  
92 ability to assess and certify various identity services such as Token Managers (TMs) which provide  
93 the authentication functions, Identity Managers (IMs) which provide the identity proofing and  
94 attribute management functions, and Credential Service Providers (CSPs) who provide a full service  
95 capability that combines authentication, identity proofing and the secure binding of token(s) to  
96 identity.

97 The identity services that have been qualified by a FICAM Approved TFP as meeting TFPAP  
98 requirements have the option of applying to the FICAM TFS Program to request approval for the  
99 authority to offer their services to the U.S. Federal Government provided they can satisfy the  
100 requirements outlined in this document.

101

### 102 **3. REQUIREMENTS**

#### 103 **3.1 General Requirements**

##### 104 **3.1.1 *FICAM TFS Adopted Trust Framework Provider Approval***

- 105 • The Applicant must have been assessed and approved by a FICAM Adopted Trust  
106 Framework Provider
- 107 • The Applicant continues to maintain an active approval status under a FICAM Adopted  
108 TFP

109 NOTE: This requirement does not apply to financial institutions regulated by Federal agencies  
110 such as the Office of the Comptroller of the Currency (OCC) or other members of the Federal  
111 Financial Institutions Examination Council (FFIEC) and the Securities and Exchanges  
112 Commission (SEC), who are required to implement a Customer Identification Program. The  
113 FICAM TFS Program may consult with federal agencies that have regulatory responsibility for  
114 the Applicant regarding input into the approval process.

##### 115 **3.1.2 *FICAM TFS Program Testing***

- 116 • The Applicant must make available to the FICAM TFS Program, on an as-needed basis, an  
117 Internet accessible environment, and supporting resources, that enables the Program to  
118 verify the Applicant's compliance to FICAM Approved Protocols, Profiles and Processes.
- 119 • A TFS Program Approved Testing Facility may conduct the tests and provide the results  
120 directly to the TFS Program or the tests may be conducted directly by the TFS Program.

##### 121 **3.1.3 *Implement FICAM TFS TFPAP Approved Configuration***

- 122 • The Applicant, when integrating with a Government Relying Party, MUST implement the  
123 FICAM TFS Program tested and approved configuration.

##### 124 **3.1.4 *Use of Transaction Data***

125 The Applicant must ensure transaction data of individuals interacting with the Applicant,  
126 generated in its interactions with the Government will not be used for data mining or analysis

127 except for security purposes, which may include investigation of administrative, technical or  
128 physical security breaches and which may or may not include a privacy breach.

129 Security breaches include breaches by internal or external forces and may include but are not  
130 limited to suspected malfeasance or misuse of data or systems. The Applicant may only use this  
131 data for the security purposes related to the work with Government and must not provide such  
132 data to any other entity with the exception of the U.S. law enforcement entities as required by  
133 law.

134 The FICAM TFS Program shall be notified, in writing, of any data mining or analysis for security  
135 purposes, in advance. Data mining, analyses and analytics for the purpose of other business  
136 objectives and purposes such as for re-sale, marketing, product analysis or product development  
137 is prohibited. Such prohibited data mining includes creating user profiles or patterns of use,  
138 whether at the level of the individual, identified user groups or the entire user community.

### 139 **3.1.5 Availability of Annual Release Plan**

140 The Applicant must provide, within 30 days of being requested by the FICAM TFS Program, an  
141 up-to-date annual release plan. The annual release plan will identify the schedule, functionality  
142 and technical characteristics of any planned changes to the service offered by the Applicant to the  
143 Government.

### 144 **3.1.6 Change, Incident and Problem Management**

145 The Applicant must provide a Change, Incident and Problem Management process. In particular,  
146 the Applicant must document and implement a process that alerts the TFS Program of changes to  
147 its service offering that would impact Government relying parties.

148 The Applicant must provide both Administrative and Technical Points of Contact to the FICAM  
149 TFS Program and make every reasonable effort to keep the contact information up to date  
150

151 **3.2 System and Operations**

152 **3.2.1 Provide Verified Identity Attributes**

153 Identity attributes that are used to uniquely distinguish between individuals (versus describing  
154 individuals) are referred to as *identifiers*. Determining uniqueness may also be referred to as  
155 *identity resolution*. Identity resolution is the ability to resolve identity attributes to a unique  
156 individual (i.e. no other individual has the same set of attributes.)

157 The Applicant, if an Identity Manager or a Credential Service Provider, seeking approval at  
158 Levels 2, 3 or 4, **MUST** identify which of the **verified** (not self-asserted) attributes, from the  
159 listing below, they are able to provide to Relying Parties (RPs):

160

Table 1: Identity Attributes

Core Identity Attributes	Supplemental Identity Attributes
<ul style="list-style-type: none"><li>• <b>Name:</b> (Legal First Name and Legal Last Name)</li><li>• <b>Current Address:</b> (Postal Code)</li><li>• <b>Current Address:</b> (City and State)</li><li>• <b>Partial Date of Birth:</b> (Month and Day)</li><li>• <b>Partial Date of Birth:</b> (Year)</li><li>• <b>Full Date of Birth</b></li><li>• <b>Partial SSN:</b> (Last 4 digits)</li><li>• <b>Full SSN:</b> (All 9 digits)</li><li>• <b>Place of Birth:</b> (City)</li><li>• <b>Place of Birth:</b> (County)</li><li>• <b>Place of Birth:</b> (State)</li><li>• <b>Place of Birth:</b> (Country)</li></ul>	<ul style="list-style-type: none"><li>• <b>Mother’s Name:</b> (At Birth)</li><li>• <b>Mother’s Name:</b> (Prior to first marriage)</li><li>• <b>Middle Name</b></li><li>• <b>Middle Initial</b></li><li>• <b>Current Address:</b> (Street)</li><li>• <b>Partial Past Address:</b> (Previous City)</li><li>• <b>Partial SSN:</b> (First 5 digits)</li><li>• <b>Sex</b></li></ul>

161 The selection of the above identity attributes is based on open standards work on identity  
162 resolution. More information on that work and how it may be leveraged by Agencies can be  
163 found in Appendix A of this document.

- 164
- 165 • Applicant must be capable of technically providing, **upon RP request via approved**  
166 **protocols and profiles**, dynamic combinations of available attributes from the Table 1  
167 listing.
  - 168 • For Identity Managers and CSPs seeking approval at Levels 2, 3, or 4, the ability to provide  
169 attributes that enable identity resolution at the RP using a standardized approach (See  
170 Appendix A - Table 2), is a critical factor in the TFS Program approval process.
  - 171 • The TFS Program, on a case-by-case basis and based on ongoing lessons learned, may  
172 approve domain specific identifiers or additional attributes, as alternatives or additions to  
173 the list above.

174

175 **3.2.2 Provide Metadata for incorporation into the E-Government Trust Services**  
176 **(EGTS) Metadata Service**

- 177 • Applicant, if an Identity Manager or a Credential Service Provider, must make all Metadata  
178 available to FICAM TFS Program who will use it for compliance verification testing and  
179 share it with Government Relying Parties as appropriate
- 180 • The attributes available from the Applicant must be documented in the Metadata provided  
181 to the FICAM TFS Program.
- 182 • Applicant must notify FICAM TFS Program of any planned Metadata changes no less than  
183 6 weeks in advance of the changes.

184 **4. APPLICANT APPROVAL PROCESS**

185 This section specifies the Applicant approval process.

186 **4.1 Consultation with FICAM TFS Program**

187 The process begins with the Applicant initiating contact with the FICAM TFS Program Manager  
188 ([TFS.EAO@gsa.gov](mailto:TFS.EAO@gsa.gov)) to schedule a consultation to discuss the TFS Process.

189 If the Applicant is interested in offering its services to the Government, it is highly recommended  
190 that it contact the TFS Program prior to initiating the TFP approval process.

191 **4.2 Approval Package Submission**

192 The Applicant submits a Request for Approval Package, which includes:

- 193 • Technical POC Contact Info
- 194 • Program Manager Contact Info
- 195 • Technical information (Metadata, Endpoints, Test Credentials etc.) that will enable  
196 FICAM Program to remotely test and verify Applicant’s conformance to FICAM  
197 protocols, profiles and processes
- 198 • Identity Services at Level 1 Only
  - 199 ○ Documentation of the FICAM Adopted TFP Approval, including details  
200 regarding trust criteria mapping
    - 201 ■ NOTE: At Level 1, this requirement does not apply to financial  
202 institutions regulated by Federal agencies such as the Office of the  
203 Comptroller of the Currency (OCC) or other members of the Federal  
204 Financial Institutions Examination Council (FFIEC) and the Securities  
205 and Exchanges Commission (SEC), who are required to implement a  
206 Customer Identification Program. The FICAM TFS Program may  
207 consult with federal agencies that have regulatory responsibility for the  
208 Applicant regarding input into the approval process.
  - 209 ○ Listing of available attributes, if any (Identity Manager or a CSP)
- 210 • Identity Services at Level 2 and Higher

- 211 ○ Documentation of the FICAM Adopted TFP Approval, including details  
212 regarding trust criteria mapping
- 213     ▪ NOTE: At Level 2, this requirement does not apply to financial  
214 institutions regulated by Federal agencies such as the Office of the  
215 Comptroller of the Currency (OCC) or other members of the Federal  
216 Financial Institutions Examination Council (FFIEC) and the Securities  
217 and Exchanges Commission (SEC), who are required to implement a  
218 Customer Identification Program. The FICAM TFS Program may  
219 consult with federal agencies that have regulatory responsibility for the  
220 Applicant regarding input into the approval process. Contact FICAM  
221 TFS Program Manager ([TFS.EAO@gsa.gov](mailto:TFS.EAO@gsa.gov)) regarding Level 3  
222 Requirements.
- 223 ○ Documentation of Change, Incident and Problem Management Process
- 224 ○ Annual Release Plan
- 225 ○ Metadata (Identity Manager or a CSP)
- 226 ○ Listing of available verified attributes (Identity Manager or a CSP)
- 227 • Documentation of the process to alert the TFS Program of changes to the Applicant's  
228 service offering that would impact Government relying parties

### 229 **4.3 Assessment and Testing**

230 Testing to verify if the Applicant is compliant to FICAM Approved Protocols, Profiles and  
231 Processes is a critical component of the Approval Process. A TFS Program Approved Testing  
232 Facility may conduct the tests and provide the results directly to the TFS Program or the tests may  
233 be conducted directly by the TFS Program.

234 The TFS Program may, as needed, request additional information from the Applicant and/or the  
235 TFP that qualified the Applicant.

### 236 **4.4 Approval Decision**

237 The FICAM TFS Program reviews the Test Results, the suitability, value, and long-term viability  
238 of the Applicant for Government use, as well as additional factors from consultation with relevant  
239 government agencies and organizations to decide on whether or not to approve the Applicant.

240 The Applicant is informed of the decision and if approved, is required to sign a MOA with the  
241 FICAM TFS Program, which delineates the Applicant's responsibilities to be compliant to the  
242 FICAM Approved Protocols, Profiles and Processes.

243 Once the FICAM TFS Program has received the signed MOA, the Applicant is added to the  
244 *Approved Identity Services List* maintained by the FICAM TFS Program and posted on appropriate  
245 websites; agencies may be notified of the approval, and Federal government RPs can use the  
246 Identity Services.

247 NOTE: Once approved the Applicant may request, from the FICAM TFS Program Manager  
248 ([TFS.EAO@gsa.gov](mailto:TFS.EAO@gsa.gov)), a Clearance Letter that demonstrates its compliance to the E-Authentication  
249 Architecture.

### 250 **4.5 Limits on approval**

251 The approval is limited to a period of one year.

252 Provided all of the requirements continue to be met, applicants may renew their status on an annual  
253 basis with the FICAM TFS Program.

254 **The FICAM TFS Program has sole discretion on granting this approval and any associated**  
255 **Trust-Marks. In addition, the TFS Program reserves the right to revoke its approval at any**  
256 **time if the Applicant is not meeting the needs of the Government or the requirements**  
257 **outlined in this document.**

258

DRAFT

259 **5. APPENDIX A – STANDARDS BASED IDENTITY RESOLUTION**

260 The core identity attributes in Section 3.2.1 are based on combinations (See Table 2 below) of identity  
 261 attributes, from the ANSI/NASPO-IDPV-2013 standard, that are **equivalent in resolving** a unique  
 262 individual in 96% of cases. For RPs seeking to fully resolve an identity, **in cases where the set of core**  
 263 **identity attribute combinations has failed**, the ANSI/NASPO-IDPV-2013 standard recommends  
 264 starting with a core identity attribute bundle and utilizing the supplemental attributes, which shall be  
 265 selected incrementally until full resolution of identity is reliably achieved.

266 Table 2: Identity Attribute Bundles<sup>1</sup>

<b>Bundle</b>	<b>Core Identity Attribute Combinations</b> Sufficient to uniquely resolve 96% <sup>2</sup> of the U.S. population	<b>Supplemental Identity Attributes</b> (To be added incrementally to the core to reach 100% resolution. <sup>3</sup> )
1	<ul style="list-style-type: none"> <li>• <b>Name:</b> (Legal First Name and Legal Last Name)</li> <li>• <b>Partial Current Address:</b> (Postal Code) or (City and State)</li> <li>• <b>Partial Date of Birth:</b> (month and day) or (year)</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Mother’s Name:</b> (At Birth or Prior to first marriage)</li> <li>• <b>Middle Name or Initial</b></li> <li>• <b>Place of Birth:</b> (Country)</li> <li>• <b>Place of Birth:</b> (State)</li> <li>• <b>Place of Birth:</b> (City)</li> <li>• <del>Current Address: (State)</del></li> <li>• <del>Current Address: (City)</del></li> <li>• <b>Current Address:</b> (Street)</li> <li>• <b>Previous City</b></li> <li>• <b>Full Date of Birth</b></li> <li>• <b>Full SSN:</b> (All 9 digits)</li> <li>• <b>Partial SSN:</b> (First 5 digits)</li> <li>• <b>Partial SSN:</b> (Last 4 digits)</li> <li>• <b>Sex</b></li> </ul>
2	<ul style="list-style-type: none"> <li>• <b>Name:</b> (Legal First Name and Legal Last Name)</li> <li>• <b>Full Date of Birth:</b> (Month, Day, and Year)</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Mother’s Name:</b> (At birth or prior to first marriage)</li> <li>• <b>Middle Name or Initial</b></li> <li>• <b>Place of Birth:</b> (Country)</li> <li>• <b>Place of Birth:</b> (State)</li> <li>• <b>Place of Birth:</b> (City)</li> </ul>

<sup>1</sup> This table is the result of a study cited in ANSI/NASPO-IDPV-2013 *Requirements and Implementation Guidelines for Assertion, Resolution, Evidence and Verification of Personal Identity*, Working Group Draft Version 3.10. September 20, 2013. The study concluded that the attribute combinations in the table is sufficient to distinguish between individuals in 96% of cases involving the entire US population (approx. 320 million)

<sup>2</sup> The threshold of 96% was selected by ANSI/NASPO-IDPV-2013 based on research indicating that it could be readily achieved using combinations of biographic attributes most commonly used in identity-related transactions

<sup>3</sup> Order of presentation shall not be interpreted as a preferred sequence.

		<ul style="list-style-type: none"> <li>• <b>Current Address:</b> (State)</li> <li>• <b>Current Address:</b> (City)</li> <li>• <b>Current Address:</b> (Street)</li> <li>• <b>Previous City</b></li> <li>• <del><b>Full Date of Birth</b></del></li> <li>• <b>Full SSN:</b> (All 9 digits)</li> <li>• <b>Partial SSN:</b> (First 5 digits)</li> <li>• <b>Partial SSN:</b> (Last 4 digits)</li> <li>• <b>Sex</b></li> </ul>
3	<ul style="list-style-type: none"> <li>• <b>Name:</b> (Legal First Name and Legal Last Name)</li> <li>• <b>Partial Current Address:</b> (Postal Code) or (City and State)</li> <li>• <b>Partial SSN:</b> (Last 4 digits)</li> </ul>	<ul style="list-style-type: none"> <li>• <b>Mother's Name:</b> (At birth or prior to first marriage)</li> <li>• <b>Middle Name or Initial</b></li> <li>• <b>Place of Birth:</b> (Country)</li> <li>• <b>Place of Birth:</b> (State)</li> <li>• <b>Place of Birth:</b> (City)</li> <li>• <b>Current Address:</b> (State)</li> <li>• <b>Current Address:</b> (City)</li> <li>• <b>Current Address:</b> (Street)</li> <li>• <b>Previous City</b></li> <li>• <b>Full Date of Birth</b></li> <li>• <b>Full SSN:</b> (All 9 digits)</li> <li>• <b>Partial SSN:</b> (First 5 digits)</li> <li>• <del><b>Partial SSN:</b> (Last 4 digits)</del></li> <li>• <b>Sex</b></li> </ul>
