As the world celebrates Data Privacy Day on 28 January, the IEEE is hosting a "Privacy for the People" Google Hangout to explore and discuss collaboration in harnessing global creativity and expertise for privacy innovation and technology solutions and to help advance cybersecurity. Join our renowned panelists in a live discussion to explore what the next era of privacy might look like in a world of increasingly smart devices and ever-more expansive forms of data collection and how bottom up, open collaboration can be used to harness global creativity and expertise for privacy innovation, best practices and solutions.

Ian Glazer-- Research Vice President and the Agenda Manager on the GTP Identity and Privacy Strategies team. Ian leads IdPS' coverage for authorization and privacy and is also a member of the National Strategy for Trusted Identities in Cyberspace (NSTIC) Identity Ecosystem Steering Group's Management Council.

Colin Wallis -- holds leadership positions across the consortium space in Information Security and Trusted Identity - particularly where policy, strategy, and technology play into cloud, big data government transformation and in the broader macro-economic challenges facing the internet.

Eve Maler -- principal analyst at Forrester serving Security and Risk Professionals. Eve is an expert on emerging identity and security solutions, identity federation, consumer-facing identity and web access management, distributed authorization, privacy enhancement and API security.

Dr. Ann Cavoukian -- recognized as one of the top privacy experts in the world and is Ontario's Information and Privacy Commissioner. Ann's groundbreaking 1995 paper on advancing privacy protection through the pursuit of privacy-enhancing technologies, or PETs, is now part of the industry lexicon.

Moderated by Joni Brennan -- as Senior Program Manager for the IEEE Standards Association (SA) and Industry Standards and Technology Organization (IEEE-ITSO), Joni builds diplomatic and collaborative relationships within and across communities of interest. She leads the Kantara Initiative, the premiere Trust Framework Provider facing multiple industry sectors.
